

COA07365-4RY

Red skinned and yellow fleshed round tubers with good skin set and shallow eyes. Yields comparable to Yukon Gold but with a higher % no 1s and lower specific gravity of 1.068. Some susceptibility to blackspot and shatter but less than Yukon Gold. No internal or external defects and a larger proportion of small tubers, 32% < 4 oz and 32% in the 4 - 6 oz categories. Fry color is light and uniform.
