Seed Potato Germplasm Program

Mini-tuber and Plantlet orders for 2021

Jenny Durrin at the Seed Potato Germplasm Lab, University of Idaho, is starting to multiply tissue culture plantlets for the next greenhouse crop cycle. The mini-tubers produced will be available Spring 2021.

Due to limited space, mid-December is the deadline for mini-tuber orders AND plantlet orders. Please contact Jenny Durrin to get an order form. Many varieties are available, including public varieties, experimental lines and the entire PVMI collection.

Contact Jenny Durrin at 208-885-6663 or jsdurrin@uidaho.edu
